MR MARK SCICLUNA

Senior Software Developer

dicarkus@hotmail.com | +61408513913 | Melbourne GitHub | LinkedIn

SUMMARY

Senior software engineer with 10+ years of experience across cross-platform application development, UI architecture, and middleware systems. Proven track record delivering production releases across iOS, Android, web, and spatial computing platforms, and managing build and release pipelines end-to-end. Currently focused on AI-driven development — orchestrating multiple LLM APIs, agentic workflows, MCP tools and RAG pipelines, with context specialised behaviour and guardrails. Brought to you in React, TypeScript, Swift, Flutter, Kotlin, LangChain and LlamaIndex. Eager to bring an enthusiasm for sharing technical expertise and learning in everything I do.

MAIN SKILLS

Swift / SwiftUI

- Extensive iOS mobile development and middleware.
- Built handtracked VisionOS frontend and core application at Rhizomenet.

Python

- Agentic AI development staple.
- MSc core language for thesis project and general work.
- Consistent language of choice at Rhizomenet for utility scripting.

Cross-Platform (Flutter/React Native)

- 6+ years Flutter/Swift/Kotlin at Rhizomenet, designing, building, and maintaining UI and Dart middleware
- 3+ years React Native whole application development, often with MongoDB and NoSQL

React / Vue

- Generally built in TypeScript, alongside JavaScript utility libraries.
- Multiple websites, utilities, and general web tooling. At RMIT, Rhizomenet, own projects

AI-Assisted Development

- Standard development is AI-generated, changes are assessed and tested before deployment.

PROFICIENT SKILLS

Language Kotlin, Java

Web HTML

AI RAG Pipelines, LangChain/LangGraph, MCP Integration, LLM/Agentic Planning, Claude Code

Infrastructure Postgres, AWS

Testing Flutter Test, Jest, XUnit

Other Node.js, Git, SQL, Docker, CI/CD, Terrform, REST, WebSocket

EXPERIENCE

Senior Software Engineer — Rhizomenet Pty. Ltd.

2017-2026

- Cross-platform development for production releases of the ZOME mobile and spatial platform.
- Spanning web (React, Vue), Swift/SwiftUI, Kotlin, Flutter, visionOS/RealityKit.
- Work focused on UI architecture, state management, middleware development, and platform-specific UI adaptations.
- REST API and third-party service integration, backend middleware in Kotlin and Swift, database querying, Jenkins CI/CD pipeline maintenance, App Store and Google Play release management, and code review.

ACHIEVEMENTS

- Managed build and release pipelines for App Store and Google Play submissions.
- Successfully built, shipped, maintained a cross-platform significantly varied in both design and language skills.
- Apple Vision Pro launch partner.

- Android XR - Samsung Galaxy XR launch.

TECHNOLOGIES

Cross-Platform (Flutter/React Native), Python, Swift / SwiftUI, React / Vue, AWS, Postgres, Node.js, Docker, CI/CD, Terrform

Senior Developer, AI Developer — carkus.com

2025-present

- Full-stack and AI engineering across web, mobile, and backend systems.
- Focused on production AI integration — multi-provider LLM orchestration, RAG pipelines, agentic workflows, and MCP tooling.
- Web application development, API design, and infrastructure management.
- Daily use of Claude Code as a core development tool.

ACHIEVEMENTS

- Have utilised multiple AI APIs, often with personality-infusion (via JSON) for characterised approaches to tasks.
- Implemented RAG pipeline for site AI to answer questions about user
- Implemented MCP for CV generation access to JobFit data
- Implemented meta-agents where the user instructs the agents toolset based on goals.

TECHNOLOGIES

Python, C#, CSS, React / Vue, Blazor/ASP.NET Core, Cross-Platform (Flutter/React Native), RAG Pipelines, MCP Integration, AI-Assisted Development, .NET, Claude Code

PROJECTS

AIAgent

Self-scaffolding agent platform — describe a task in plain language and it builds a purpose-built agent (role, tools, implementation) via the Claude API.

SmoothSoftware

A marketing/landing-page site with a React + Vite frontend and an ASP.NET Core minimal-API backend; a contact form sends inquiries via Mailgun.

EDUCATION

MSc Computer Science

Royal Melbourne Institute of Technology (RMIT)

Robotics AI: task re-planning after unexpected events, plan repair, and algorithmic efficiency.

Master's Thesis : 'Search efficiency in robotic task planning'
