SKILLS

Computer Science

M.Sc. Computer Science (Distinction) — RMIT University

Algorithm design and efficiency, search heuristics, gaming AI, robotic task planning.

Python • Java • PDDL

Highly Skilled

Swift • SwiftUI • Flutter • React/React Native (Vite, Expo) • TypeScript • Blazor

Associated Skills

Kotlin • Java • CSS • UIKit • C# • RESTful APIs • Node.js • CI/CD (Jenkins) • Python • JSON • XML • YAML

Other / Exposure

PHP • AngularJS • ASP .NET

Additional Interests

Unity (C#) • Game development

EDUCATION

Master of Computer Science

RMIT University — 2018

For my Master's project I demonstrated robotics' dynamic re-planning in random environments

Master's Thesis : 'Heuristic search efficiency in robotic task generation'

EXPERIENCE

2025 — carkus.com

Senior Developer, Owner

Increasingly very AI-focused work, both for meeting the requirements of clients and fun.

Have utilised multiple AI APIs, often with personality-infusion (via JSON) for characterised approaches to tasks.

Likewise, implementation of meta-agents where the user instructs the agents toolset based on goals.

Technologies

.NET • React/React Native (Vite, Expo) • TypeScript • Python • Claude/Gemini/OpenAI API

2017–2026 — ZOME (Rhizomenet)

Senior Application Developer (Middleware & UI)

Cross-platform development for production releases of the ZOME mobile and spatial platform.

Work focused on UI architecture, state management, middleware development, and UI adaptations across multiple platforms.

Managed build and release pipelines for App Store and Google Play submissions.

Successfully built, shipped, maintained a cross-platform significantly varied in both design and language skills

Platforms shipped:

- iOS - App Store
- Android - Google Play
- VisionOS - Apple Vision Pro launch partner
- Android XR - Samsung Galaxy XR launch

Technologies

Flutter • Swift • SwiftUI • Kotlin • UIKit • Node.js • React • Vue • Java • MVVM

2007–2014 — RMIT University

Senior Application Developer (UI)

Development and design of e-learning applications and supporting middleware systems. Responsibilities included front-end architecture, software maintenance, and adaptation of educational platforms and digital content.

Technologies

.NET • React • AngularJS • MVC

PROJECTS

ZOME International Development & Promotion

Los Angeles — 2022

Development support and platform promotion during international engagement and launch preparation for the ZOME platform.

International Collaboration

Wearable UI

Adapted designs by internationally renowned fashion designer Hussein Chalayan into interactive digital fashion — wearable interfaces.
