MARK SCICLUNA

Mobile Engineer

dicarkus@hotmail.com | +61408513913 | Melbourne GitHub | LinkedIn

SUMMARY

Senior software engineer with 10+ years professional experience.

Commercial, in-house, and educational development across web, iOS, Android, cross-platform, and spatial computing (visionOS, XR).

PROFICIENT SKILLS

Mobile (Cross-platform and Native) Flutter, iOS, React Native, Jetpack Compose

Web JavaScript, React, HTML, CSS, TypeScript, Blazor/ASP.NET Core

AI Claude & Gemini APIs, Agentic Orchestration, RAG Pipelines, LangChain/LangGraph, MCP Integration, LlamaIndex, Schema-Constrained Generation, LLM/PDDL Planning

Language Swift / SwiftUI, Python, C#, Kotlin, Java

Other NodeJS, Git / CI·CD, systemd, .NET, Vue

EXPERIENCE

Senior Developer, AI Developer — carkus.com

2025-present

- Increasingly very AI-focused work, both for meeting the requirements of clients and fun.

ACHIEVEMENTS

- Have utilised multiple AI APIs, often with personality-infusion (via JSON) for characterised approaches to tasks.
- Likewise, implementation of meta-agents where the user instructs the agents toolset based on goals.

TECHNOLOGIES Claude & Gemini APIs, .NET, Git / CI·CD, CSS, React, RAG Pipelines, MCP Integration, LangChain/LangGraph, LlamaIndex, Agentic Orchestration, Python

Senior Software Engineer — Rhizomenet Pty. Ltd.

2017-2026

- Cross-platform development for production releases of the ZOME mobile and spatial platform.
- Work focused on UI architecture, state management, middleware development, and UI adaptations across multiple platforms.

ACHIEVEMENTS

- Managed build and release pipelines for App Store and Google Play submissions.
- Successfully built, shipped, maintained a cross-platform significantly varied in both design and language skills
- Apple Vision Pro launch partner
- Android XR - Samsung Galaxy XR launch

TECHNOLOGIES Vue, Flutter, iOS, React, TypeScript, Swift / SwiftUI, NodeJS, Python

EDUCATION

MSc Computer Science

Royal Melbourne Institute of Technology (RMIT)

For my Master's project I demonstrated a technique for partial re-planning in exogenous (unexpected) events, online plan repair for AI task planning
Master's Thesis : 'Search efficiency in robotic task planning'
